With over 70 years working with both dealers and farmers, PFG AMERICA has a unique perspective on what makes a tractor dealership successful.

We recognize that, first and foremost, a new tractor is a business tool. Farmers and contractors don't just want a good product at a good price, they need to be assured that when there's a problem the dealer can get them going again - quickly. In short, they want consistent parts supply and reliable service support.

Of course, it can't all happen in a vacuum. Dealers themselves need access to a comprehensive parts facility with fast delivery, technical advice for difficult problems, and ongoing technical and sales training to ensure they are properly prepared.

PFG America delivers on all these fronts. We operate from a brand-new facility in Dacula, Georgia, with in-house service expertise and two dedicated training areas. Our massive parts warehouse holds over 8,000 lines in stock with a first-fill target of 95%, and we offer an air freight service from the main Deutz-Fahr factory in Germany.

This commitment to parts and service is fully supported by a modern technology platform. Our online parts ordering and warranty management systems are easy to use and always available.
